

Richard Kisivii

Full-stack Software Developer

Nairobi, Kenya. | [GitHub Profile.](#) | [LinkedIn Profile.](#)

About Me

Fullstack Software Developer with expertise in the JavaScript ecosystem and AI workflow automation (n8n). I build and deploy scalable web and mobile applications using React, Next.js, and NestJS, managed within Turborepo/Nx monorepos. Experienced in designing responsive UI/UX, implementing GraphQL APIs, and streamlining delivery through GitHub Workflows for remote and on-site teams.

Technical Skills

Frontend Development:

- React, Next.js, TanStack Start, React Native, Tailwind CSS, Radix UI.

Backend & APIs:

- Node.js, NestJS, Express.js, GraphQL (Apollo), REST APIs.

Architecture & Tooling:

- Monorepos (Turborepo, Nx), Microservices, Design Patterns.

AI & Automation:

- AI-driven Workflows (n8n), LLM Integration, Automated Document Drafting.

DevOps & Deployment:

- GitHub Workflows (CI/CD), Docker, Cloud Hosting, Version Control (Git).

Soft Skills:

- Remote Collaboration, Technical Documentation, Agile Methodology, Analytical Problem-Solving.

Technical Training & Professional Development

CS50: Introduction to Computer Science | Harvard University (via edX)

- Focus:** Algorithms, Data Structures, and Software Engineering Principles
- Expected Completion: 2026

Responsive Web Design & Frontend Development | freeCodeCamp

- Focus:** Modern CSS, UI Design Systems, and Advanced Frontend Architecture
- 2024 – Present (In Progress)

Fullstack Web Development Program | W3Schools

- Curriculum:** HTML5, CSS3, JavaScript (ES6+), SQL, and Node.js
- Completed 2023

Work Experience

Full-stack Developer (Front-end Heavy) | Seraa AI

January 2025 – Present

Roles and Responsibilities:

- System Migration:** Leading the architectural migration from Next.js to TanStack Start and transitioning state management from TanStack Hooks to Apollo Client for improved data consistency.
- AI Integration:** Engineering the core interface and logic for AI-driven modules, including automated legal workflows, document drafting, and intelligent reporting systems.
- Identity Management:** Developed and optimized secure authentication flows, bridging backend logic with frontend implementation.
- Responsive Architecture:** Standardized mobile responsiveness across all platforms, ensuring UI/UX consistency across varied screen sizes using Tailwind CSS.
- Workflow Automation:** Implemented automated engagement systems within the organization to streamline legal operations and document lifecycle management.

Frontend Developer (Volunteer) | Lansan Technology Company

January 2023 – December 2024

Roles and Responsibilities:

- SaaS Development:** Contributed to "My Caretaker," a multi-platform SaaS application managed within an Nx Monorepo.
- API Integration:** Successfully consumed and integrated complex GraphQL APIs to power dynamic data visualization and user interactions.
- UI/UX Engineering:** Designed and implemented scalable, reusable UI components using Material UI (MUI).
- Cross-Platform Support:** Maintained frontend consistency across a Next.js web client, a React Native mobile app, and a USSD management interface for accessibility.
